■ FEATURES

● Energy efficiency

	Extra Cold Climate Area Model		
	AGU9RLF	AGU12RLF	AGU15RLF
Seasonal Energy Efficiency Ratio (SEER)	26.0	22.7	20.3
Heating Seasonal Performance Factor (HSPF)	12.4	11.3	11.0

MEASUREMENT CONDITIONS
ANSI/ASHRAE STANDARD 37-1988

2-Fan & Wide airflow

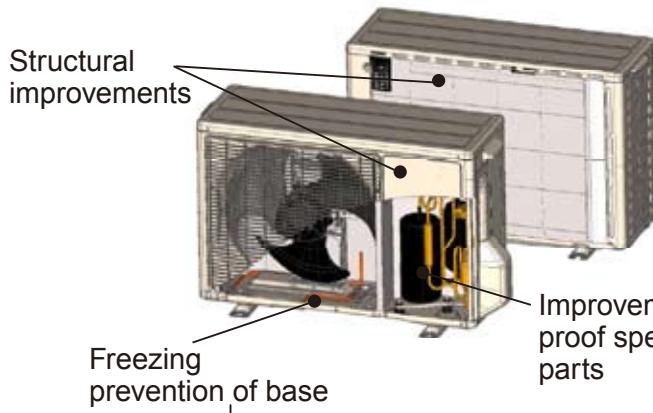

● Low outdoor air temperature correspondence

Corresponds to heating operation at -15°F (-26°C) outdoor air temperature (AOU9, 12, 15RLFFH)

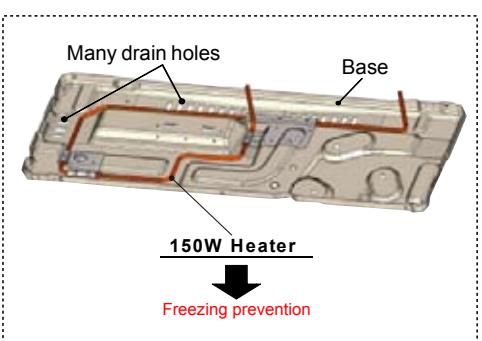

Heating
-15 to 75°F (-26 to 24°C)

Specification improvement to allow operation under extremely low outdoor temperature -15°F (-26°C) without trouble

Extra cold climate area model

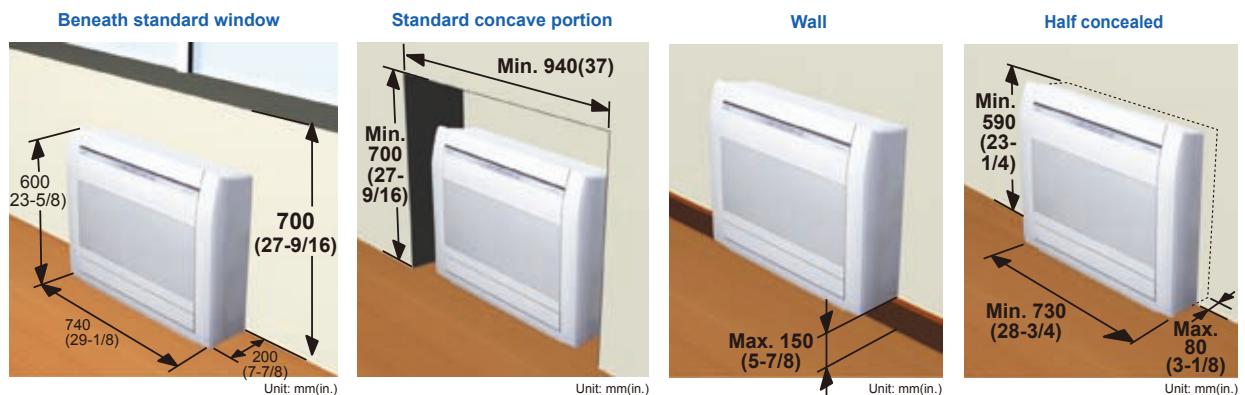

Improvement of cold-proof specifications of parts

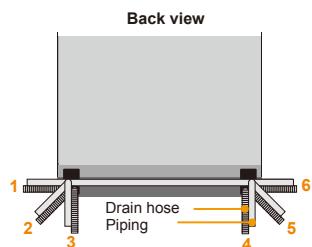

● Flexible & easy installation

Piping space is wide and connection work is easy.

Choice of 6-direction drain & piping connection

Space is wide and piping work is easy

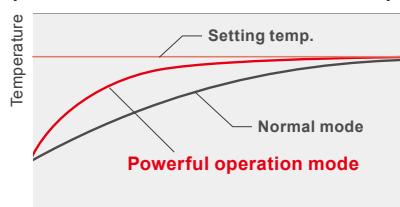

● Super quiet operation

Air flow mode can be set in 4 steps and more detailed air flow setting is possible.

● Powerful operation

Continuous operation by maximum air flow and maximum compressor speed after a certain period of time allows the temperature to reach the setting temp. quickly.

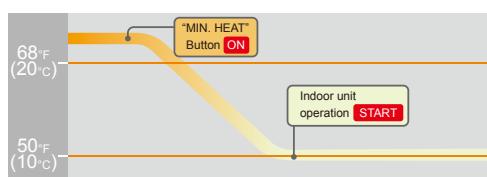

● MIN. HEAT Operation *Only available with Wireless RC.

The room temperature can be set to go no lower than 50°F (10°C), thus ensuring that the room does not get too cold when not occupied

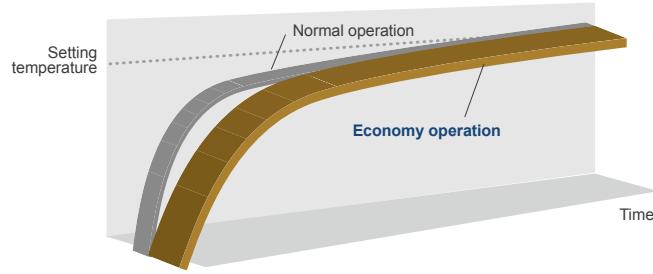

Caution)

- When the room temperature is higher than 50°F (10°C), "MIN. HEAT" operation does not start. Operation starts and maintains the room temperature at 50°F (10°C) when the temperature drops below 50°F (10°C).
- When "MIN. HEAT" operation stops, the room set temperature quickly returns to the preset temperature.

● Economy operation

Limits the maximum operation current, and the power consumption is cut down and the maximum load is suppressed.

● Air conditioner filter feature

Apple-catechin filter

Long-life ion deodorization filter

2. WIRELESS REMOTE CONTROLLER

■ FEATURES

- *4 mode timer setup available (ON / OFF / PROGRAM / SLEEP).
- *Easy operation.
- *Easy to change custom code (max. 4 custom codes) by button operation.

● Built-in timers

Select from four different timer programs (On / Off / Program / Sleep).

● Program timer

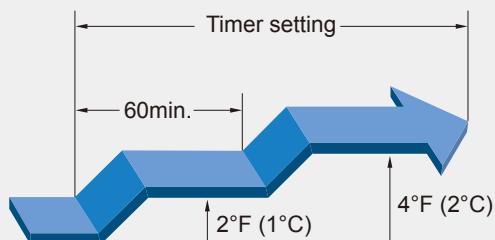

The program timer operates the on and off timer once within a 24-hour period.

● Sleep timer

The sleep timer function automatically corrects the temperature thermostat setting according to the timer setting to prevent excessive cooling and heating while sleeping.

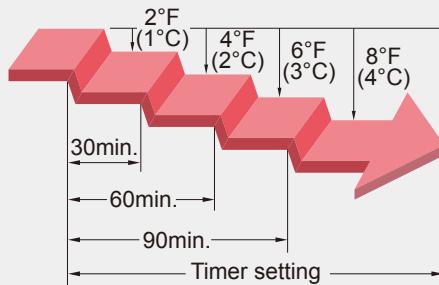

Cooling operation/dry operation

When the sleep timer is set, the set temperature automatically rises 2°F (1°C) every hour. The set temperature can rise up to a maximum of 4°F (2°C).

Heating operation

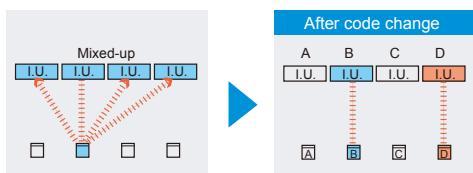

When the sleep timer is set, the set temperature automatically drops 2°F (1°C) every 30 minutes. The set temperature can drop to a maximum of 8°F (4°C).

● Simple function setting

Setting of the air conditioner selection function is performed by remote controller.

● Switching remote controller custom code

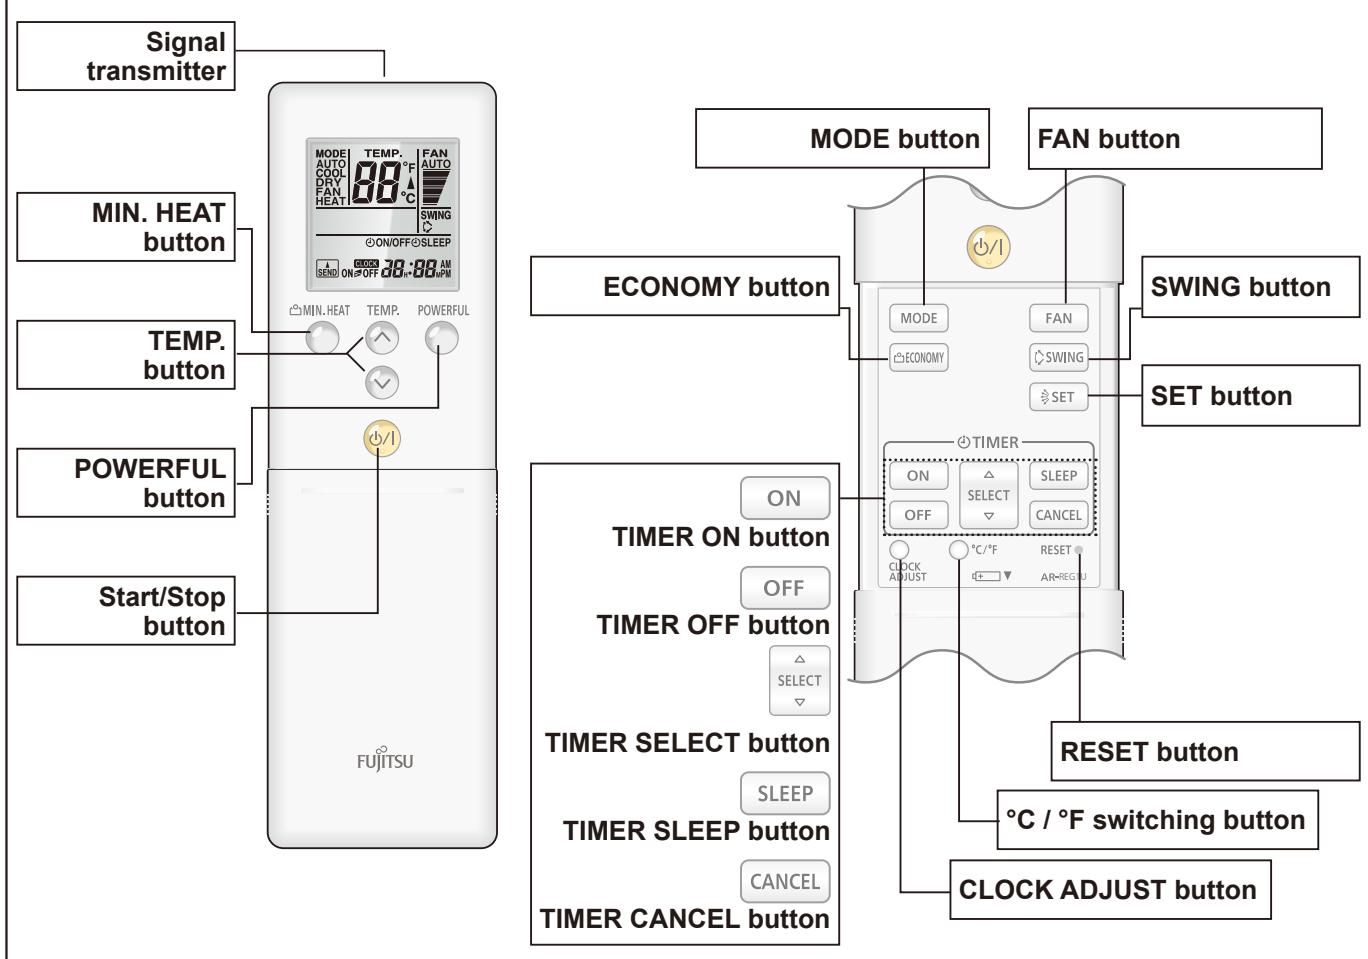

- Code selector switch eliminates unit being wrongly switched.
(Up to 4 custom codes can be set.)

*I.U.=Indoor unit

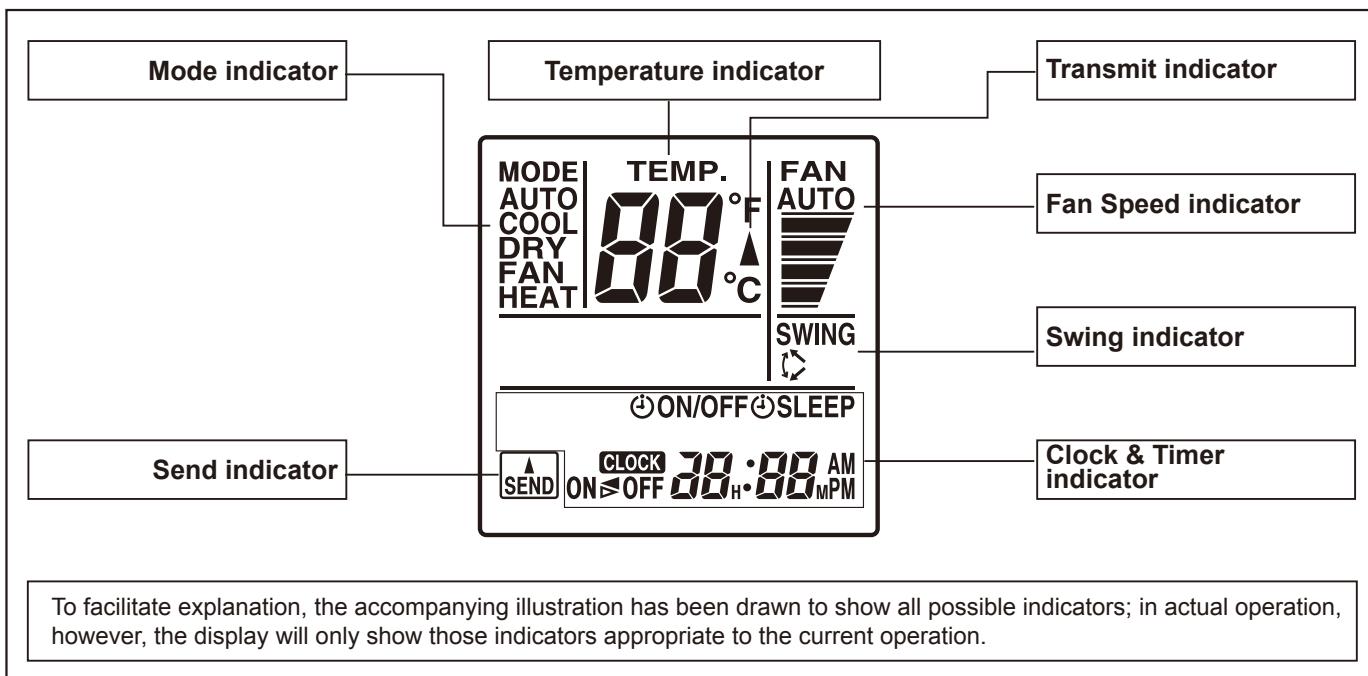

● To change the temperature unit

Easy to change the temperature unit (°F ↔ °C) by button operation.

Pipe length : 24ft.(7.5m), Height difference:0 m. (Outdoor unit-Indoor unit)

The protective function might work when using it outside the operation range.

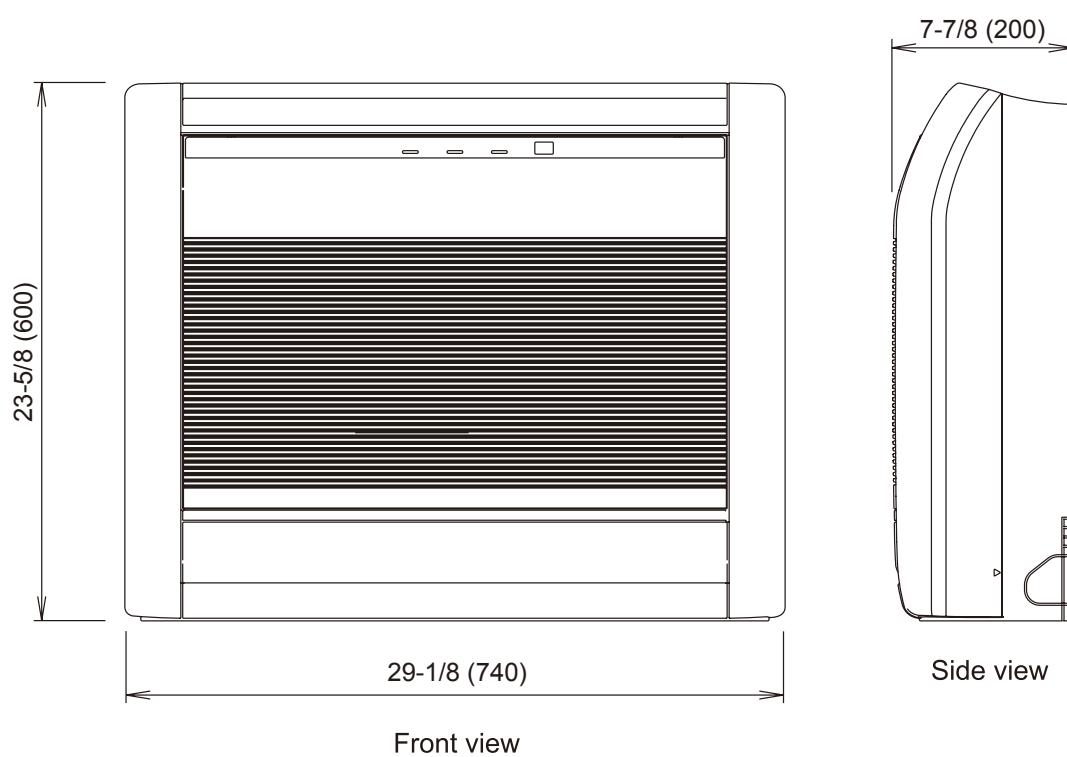

*1: The maximum current is the maximum value when the operated within the operation range.

*2: These are the measured values in the manufacturer's anechoic chamber. Because of the surrounding sound environment, the sound levels measured in actual installation conditions might be higher than the specified values here.

12. FUNCTION SETTINGS

12-1. INDOOR UNIT (Setting by remote controller)

- The function settings of the control of the indoor unit can be changed by this procedure according to the installation conditions. Incorrect settings can cause the indoor unit to malfunction.
- After the power is turned on, perform the Function Setting according to the installation conditions using the remote controller.
- The settings may be selected between the following two: Function Number and Setting Value.
- Settings will not be changed if invalid numbers or setting values are selected.

■ PREPARATION

- Before turning on the power of the indoor unit:
 - Confirm whether the piping air-tight test and vacuuming have been conducted.
 - Reconfirm whether there is no miswiring.
- Turn on the power of the indoor units.

■ FUNCTION SETTING METHOD (for Wireless remote controller)

Entering the Function Setting Mode

- While pressing the POWERFUL button and SET TEMP. (\wedge) simultaneously, press the RESET button to enter the function setting mode.

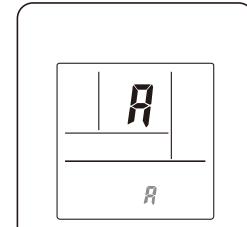

STEP 1

Setting the Remote controller Custom Code

Use the following steps to select the custom code of the remote controller. (Note that the air conditioner cannot receive a signal if the air conditioner has not been set for the matching custom code.) The custom codes that are set through this process are applicable only during the Function Setting process. For details on how to set the custom codes through the normal process, refer to "REMOTE CONTROLLER CUSTOM CODE SETTING".

- Press the SET TEMP. (\wedge) (\vee) button to change the custom code between $A \rightarrow B \rightarrow C \rightarrow D$.
Match the code on the display to the air conditioner custom code. (initially set to A)
(If the custom code does not need to be selected, press the MIN. HEAT button and proceed to **STEP 2**.)
- Press the MODE button and check that the indoor unit can receive signals at the displayed custom code.
- Press the MIN. HEAT button to accept the custom code, and proceed to **STEP 2**.

The air conditioner custom code is set to "A" prior to shipment.

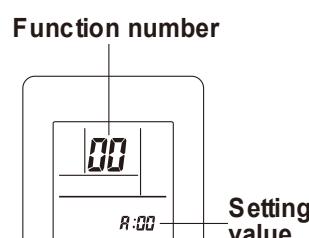

The remote controller resets to custom code A when the batteries in the remote controller are replaced. If you use a custom code other than custom code A, reset the custom code after replacing the batteries.

If you do not know the air conditioner custom code setting, try each of the custom codes ($A \rightarrow B \rightarrow C \rightarrow D$) until you find the code which operates the air conditioner.

STEP 2

Selecting the Function Number and Setting Value

- Press the SET TEMP. (\wedge) (\vee) buttons to select the function number.
(Press the MIN. HEAT button to switch between the left and right digits.)
- Press the POWERFUL button to proceed to setting the value.
(Press the POWERFUL button again to return to the function number selection.)
- Press the SET TEMP. (\wedge) (\vee) buttons to select the setting value.
(Press the MIN. HEAT button to switch between the left and right digits.)
- Press the MODE button, then the START/STOP button in order to fix the settings.
- Press the RESET button to end the function setting mode.
- After completing the Function Setting, be sure to turn off the power and turn it on again.

CAUTION

After turning off the power, wait 30 seconds or more before turning on it again.
The Function Setting will not become active unless the power is turned off then on again.

11) Heat Insulation condition (building insulation)

Heat insulation conditions differ according to the installed environment.

Standard insulation "00" allows system to rapidly respond to the cooling or heating load changes. High insulation "01" is when the heat insulation structure of the building is high and does not require system to rapidly respond to cooling or heating load changes.

When High insulation "01" is selected;

- Overheating (overcooling) is prevented at the start-up.
- All room temp. control settings (Function 30, 31, 92, 93) will reset to No correction [0.0°F (0.0°C)].

(◆...Factory setting)		
Function number	Setting value	Setting description
95	00	Standard insulation
	01	High insulation

NOTE:

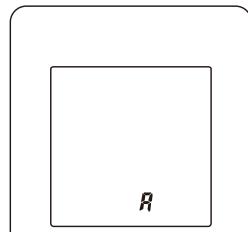

When changing Function 95, perform this setting before other Room temp. control settings (Function 30, 31, 92, 93). IF Function 95 is not set first, Room temperature control settings (Function 30, 31, 92, 93) will be reset and you must re-do them again.

■ REMOTE CONTROLLER CUSTOM CODE SETTING

Use the following steps to select the custom code of the remote controller.

(Note that the air conditioner cannot receive a signal if the air conditioner has not been set for the matching custom code.)

1. Press the START/STOP button until only the clock is displayed on the remote controller display.
2. Press the MODE button for at least five seconds to display the current custom code (initially set to A).
3. Press the SET TEMP. (\wedge) (\vee) button to change the custom code between $A \rightarrow B \rightarrow C \rightarrow D$.
Match the code on the display to the air conditioner custom code.
4. Press the MODE button again to return to the clock display. The custom code will be changed.

If no buttons are pressed within 30 seconds after the custom code is displayed, the system returns to the original clock display. In this case, start again from step 1.

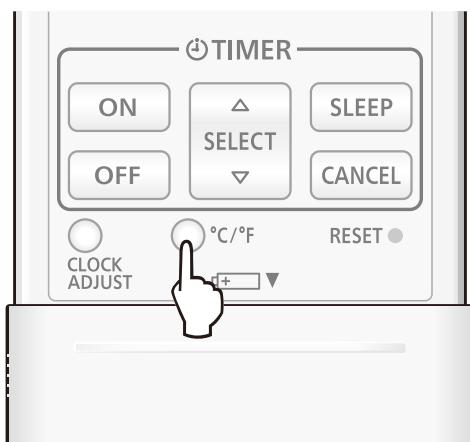

The air conditioner custom code is set to A prior to shipment.

The remote controller resets to custom code A when the batteries in the remote controller are replaced. If you use a custom code other than custom code A, reset the custom code after replacing the batteries. If you do not know the air conditioner custom code setting, try each of the custom codes ($A \rightarrow B \rightarrow C \rightarrow D$) until you find the code which operates the air conditioner.

■ REMOTE CONTROLLER TEMPERATURE UNIT

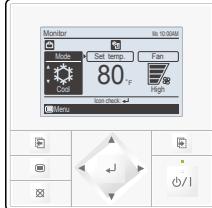

To change the temperature unit:

- Press the $^{\circ}\text{C} / ^{\circ}\text{F}$ switching button to select the preferred temperature unit. (Factory setting is $^{\circ}\text{F}$.)
