TECHNICAL DATA

**HEAT RECOVERY VENTILATION** 

#### DESCRIPTION

VENTS' HRV 150 EC are the complete whole house ventilation system designed to bring a continuous supply of fresh air into the house while exhausting an equal amount of stale air. Five year warranty.

#### CASING

- Steel casing is covered with high-quality multilayer aluminium and zinc alloy to prevent corrosion.
- The casing is equipped with a switch to turn the ventilator off when the service panel is opened.

#### AIR FILTRATION

- Washable MERV 6 air filters in exhaust and supply air streams
- Optional supply: anti grease aluminum filter.

#### **HEAT RECOVERY CORE**

Polystyrene cross-flow core ensures efficient heat recovery.

#### **FANS**

High efficient electronically commutated motors with external motor and impeller with backward curved blades. EC motors are featured with high performance and total speed controllable range. The electric motors and impellers are dynamically balanced.

#### **DEFROST SYSTEM**

To protect the Recovery Core, an antifreeze electronic protection system is applied. It switches the supply fan off according to the temperature sensor settings. Warm extract air defrosts the HRV core then the supply fan switches on and the ventilator continues operating under rated conditions.

Tel: 888-640-0925 Sales@ventsus.com 513-348-3853 VentsUS.com Fax: 513-268-4597 11013 Kenwood Road, Cincinnati, Ohio 45242

#### CONSTANT FLOW

Frigate HRV 150 EC CF has an automatic constant air flow control function to keep the air flow in supply and exhaust air ducts constant even in case of variable air resistance.

This function is provided with the integrated air flow control units. The electronic sensors convert the actual air flow to the analogue signal that is proportional to the air flow in the air duct. These signals are transmitted to the controller that controls the rotation speed of a respective fan in such a way that the actual rotations speed is equal to the set value.

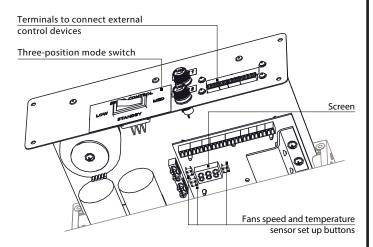

#### MANUAL BALANCING

Manual balancing is a standard balancing system. Fan speed manually adjusted by operating on units controller (Built-in control panel with independent fan speed adjustment 0%-100%).

#### **CONTROL BOARD**

The unit incorporates an integrated control system with following functions:

- · Operation mode switch.
- Airflow balancing enabled by supply and exhaust fan independent speed adjustment from 0 to 100% (percentage is displayed on built in screen).
- Automatic recovery core frost protection.
- External control device connection (up to 5 at the same time).

### **SUITABLE FOR:**

Bathroom / kitchen / apartments / cottages / small offices.
